

Skizzen von gepanzerten Schiffen.

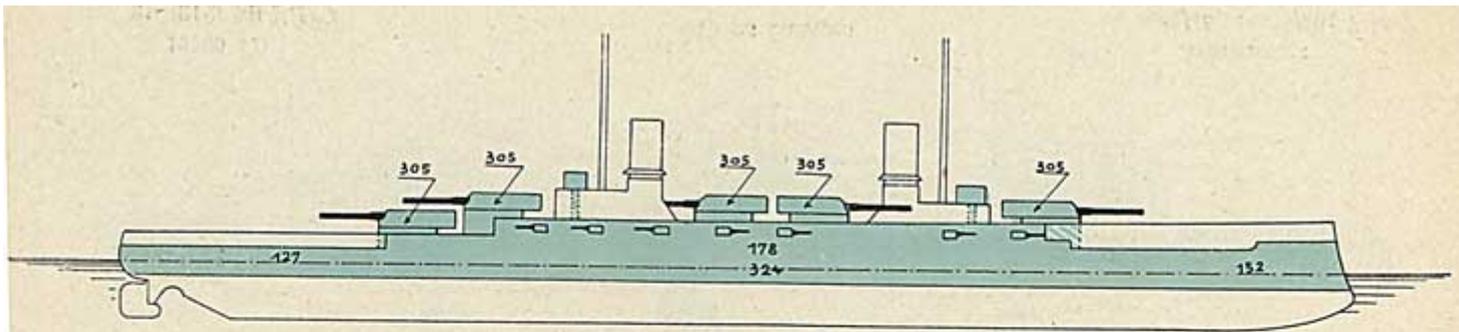

In den nachstehenden Schiffsskizzen sind die wichtigsten Gefechtselemente und die äußeren Linien im Maßstabe 1:1500 wiedergeben. Das Typschiff, nach dem die Schiffsklasse benannt wird, ist in stärkerem Druck zuerst genannt.

Den Skizzen ist die Angabe über Displacement, Fahrgeschwindigkeit und Armierung der Schiffe beigefügt. Bei Armierung sind jedoch nur die Geschütze bis zum 6.5 cm Kaliber berücksichtigt.

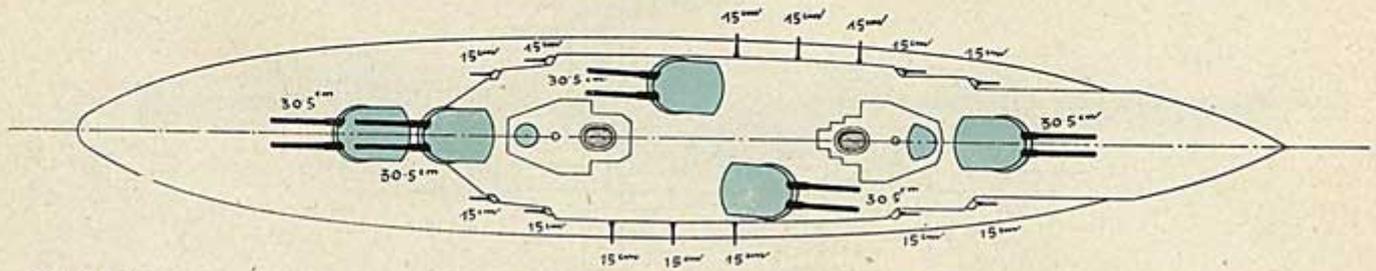

Die Panzerstärken sind in Millimeter angegeben.

T bedeutet Torpedolancierrohr, MIFG Fahrgeschwindigkeit in Seemeilen, ulr Unterwasserlancierrohr, tD Displacement in englischen Tonnen
